## WELCOME

---

The symposium chairs and co-chairs would like to welcome the participants and thank all active members of the TC for their continuous support through participation, supply of materials and discussions during the TC activities.

The RILEM Technical Committee 252 CMB on Chemo-Mechanical Characterization of Bituminous Materials was launched in Stockholm in June 2013 by Niki Kringos and Lily Poulikakos. The TC was active for 5 years (2013-2018) and intended to combine chemical and mechanical characterization of bituminous materials in order to gain a better understanding of the behavior of this complex material. Through the cooperative effort facilitated through RILEM, it was possible to bring more visibility to this field of research which, in a traditional construction field, is not always easy to achieve.

Applying Chemo-Mechanics allows us to gain a better understanding of the long-term behavior of traditional and new materials such as mixtures containing a high amount of RAP and prepared at a lower temperature. Having a fundamental understanding of the combined chemo-mechanical properties can greatly enhance the tools used to improve the material's sustainability and functionality.

As it is apparent by the wide range of topics that are presented in the contributions of this symposium, chemo-mechanical characterization is gaining more acceptance within our community. The inputs were divided among 7 themes. Bitumen Aging Mechanisms and Characterization is the topic of Part I. Part II addresses Chemo-Mechanical Coupling. In Part III Low, Intermediate and High Temperature Behavior is discussed. Part IV addresses Microstructure and Micro-Mechanics. Part V covers the topic of Recycling and Rejuvenation. In Part VI Multiphase Analysis of Binders is discussed and Part VII is devoted to other topics in the field. Looking into the future, as conventional materials become scarce, using alternative materials is inevitable and we hope that this type of characterization will continue to flourish in the asphalt field.

## KEYNOTE LECTURE

---

***Title:***

Physics, Chemistry and Mechanics of the “Dark Matter” That Holds Our Roads Together

***Lecturer:***

Dr. Amit Bhasin  
Civil, Architectural and Environmental Engineering  
The University of Texas at Austin, U.S.A.

***Abstract:***

Bitumen is literally the glue that holds most of our roadway infrastructure together and by extension has a critical social and economic impact. A challenge faced by our industry is to produce binders that are consistent in quality and tailored for different pavement applications while using a raw material that constantly changes with time and source. This challenge is amplified by the increasing demand to use more recycled asphalt binder from old roadways and/or extend it using other sustainable and eco-friendly materials. Overcoming this challenge requires an integration of theoretical and experimental tools from various disciplines such as materials science and mechanics. This talk explores some of the recent work done to better understand the relationship between the chemical composition of the asphalt binder, its microstructure and engineering properties. This talk also lays out an inter-disciplinary framework that not only aims to advance specific areas of science and engineering but also help advance the state of practice in pavement materials engineering.

***BIO:***

Dr. Bhasin is a faculty member in the Dept. of Civil, Architectural and Environmental Engineering and Director of the Center for Transportation Research (CTR) at The University of Texas at Austin. His research and teaching interests are in the area of infrastructure materials. Dr. Bhasin has led several research projects sponsored by public and private entities from within and outside of the United States. He is actively involved in several national and international organizations and committees pertaining to research in the area of pavements and materials. He is currently serving as the President for the Academy of Pavement Science and Engineering, which is an international organization of academics involved in this area. His research and teaching have been recognized through several different awards and honors including the National Science Foundation CAREER award and the American Society for Civil Engineers (ASCE) Walter L. Huber Research Prize.

CHEMO MECHANICAL CHARACTERIZATION OF BITUMINOUS MATERIALS

## 09:00 OPENING SESSION

Welcome (Room: Burj Khalifa)

### **Michael Wistuba**

Professor and head of the Braunschweig Pavement Engineering Centre at Technische Universität Braunschweig and co-chair of the RILEM 252-CMB Symposium

### **Thomas Siefer**

Dean of the Faculty of the Department of Architecture, Civil Engineering and Environmental Sciences at Technische Universität Braunschweig

### **Lily Poulikakos**

Senior scientists at EMPA, Deputy chair of the RILEM Technical Committee 252-CMB and chair of the RILEM 252-CMB Symposium

## 09:30 SESSION I: Chemo-Mechanical Characterization of Bituminous Materials: Multiphase Analysis of Binders (Room: Burj Khalifa)

Session Chair: Jean-Pascal Planche, Western Research Institute, US

### **Effect of Recycled Materials on Intermediate Temperature Cracking Performance of Asphalt Mixtures**

Wei Cao, Louay Mohammad, Peyman Barghabany

### **Qualitative Detection of the Presence of Gilsonite in the Bituminous Blends based on thin Layer Chromatography**

Michalina Makowska, Terhi Pellinen

### **Resistance to Moisture-Induced Damage of Asphalt Mixtures and Aggregate-Binder Interfaces**

Jorge Lucas Júnior, Lucas Babadopulos, Jorge Soares

### **Study on Effects of Aging on SBS Modified Asphalt Based on GPC and Rheological Methods**

Daisong Luo, Meng Guo, Yiqiu Tan, Yafei Li

### 14:30 SESSION III: Chemo-Mechanical Characterization of Bituminous Materials: Recycling and Rejuvenation (Room: Burj Khalifa)

Session Chair: Laurent Porot, Kraton Corporation, the Netherlands

**A new Green Rejuvenator: Evaluation of Structural Changes of Aged and Recycled Bitumens by means of Rheology and NMR**

Cesare Oliviero Rossi, Paolino Caputo, Valeria Loise, Saltanat Ashimova, Bagdat Teltayev, Cesare Sangiorgi  
(by title only)

**A Rheological Study on Rejuvenated Binder Containing very high Content of Aged Bitumen**

Marco Pasetto, Andrea Baliello, Giovanni Giacomello, Emiliano Pasquini

**An Examination of Property Changes of Repeatedly Recycled Asphalt Bitumen using Rejuvenator with High Aromatic Content**

Atsushi Kawakami, Yoko Kawashima, Hiroyuki Nitta, Masayuki Yabu

**Effects of Rejuvenator on Reclaimed Asphalt Binder: An Exploratory Study of the RILEM TC 264-RAP Task Group 3**

Augusto Cannone Falchetto, Laurent Porot, Chiara Riccardi, Martin Hugener, Gabriele Tebaldi, Eshan Dave

**New Binders using Natural Bitumen Selenizza**

Edith Tartari

**Rejuvenated Binders, Reclaimed Binders and Paving Bitumens, are they any Different?**

Tomas Koudelka, Pavel Coufalik, Michal Varaus, and Iva Coufalikova

**Study on the Mechanical Properties of Waste Cooking Oil Modified Asphalt Binder**

Xin Qu, Dawei Wang, Quan Liu, Markus Oeser, Chao Wang

**The Effect of the Nature of Rejuvenators on the Rheological Properties of Aged Asphalt Binders**

Raúl Tauste, Fernando Moreno-Navarro, Miguel Sol-Sánchez, M<sup>a</sup> Carmen Rubio-Gámez

### 14:30 SESSION VII: Chemo-Mechanical Characterization of Bituminous Materials: Bitumen Aging Mechanisms and Characterization (Room: Burj Khalifa)

*Session Chair: Jeroen Besamusca, KPR&T, the Netherlands*

#### **Comparison of Short Term Laboratory Ageing on Virgin and Recovered Binder from HMA/WMA Mixtures**

Gilda Ferrotti, Hassan Baaj, Jeroen Besamusca, Maurizio Bocci, Augusto Cannone-Falchetto, James Grenfell, Bernhard Hofko, Laurent Porot, Lily Poulidakos, Zhanping You

#### **Effect of Artificial Ageing on Two Different Bitumen of Different Origin but Same Performance Grade**

Alexandre Rogeaux, Alan Carter, Daniel Perraton, Abdeldjalil Daoudi

#### **Evaluation of Viscoelastic Properties and Cracking Behaviour of Asphalt Mixtures with Laboratory Aging**

Runhua Zhang, Jo Sias Daniel, Eshan V. Dave

#### **Microstructural Investigation of Reclaimed Asphalt Binder with Bio-Based Rejuvenators**

Maria Chiara Cavalli, Martins Zaumanis, Lily Poulidakos

#### **Recommendations of RILEM TC 252-CMB on the Effect of Short Term Aging Temperature on Long Term Properties of Asphalt Binder**

Lily D. Poulidakos, Bernhard Hofko, Augusto Cannone Falchetto, Laurent Porot, Gilda Ferrotti, Peter Mikhailenko

#### **Rheology and Bituminous binder, a Review of Different Analyses**

Laurent Porot

#### **Short Term Aging - Influence of Mixing Time at Laboratory Specimen Production**

Daniel Steiner, Daniel Maschauer, and Bernhard Hofko

## LIST OF POSTERS BY TOPIC

---

### **Multiphase Analysis of Binders**

**Investigation of the Calculation Modeling of Asphalt Binder Surface Energy based on the Atomic Force Microscope (AFM)**

Rong Chang, Erhu Yan, Jian Xu, GaoChao Wang

### **Other Approaches**

**How to Evaluate with Relevance the Compactability of Warm Mixes Using the Gyrotory Compactor (GC)**

Abdeldjalil Daoudi, Anne Dony, Layella Ziyani, Nicolas Picard, Julien Buisson

**Hybrid Approach to Characterize Reflective Cracking in Airport Pavements**

Tirupan Mandal, Mesbah Ahmed, and Hao Yin, Richard Ji

**Novel Application of the Falling Weight Deflectometer Test: Detection of Surface and Subsurface Distresses**

A. Chatterjee, Y. Tsai

### **Microstructure and Micro-Mechanics**

**Investigation of the Asphalt Binder Sample Preparation Methods based on AFM**

Zhijun Wang, Rong Chang, Zhenyu Zhou, Yongchun Qin, Gaochao Wang

### **Bitumen Aging Mechanisms and Characterization**

**Chemomap Imaging Microscopy use to in Situ Assess Oxidative Ageing in Compacted Asphalt Mixtures**

S. Vassaux, V. Gaudefroy, L. Boulangé, A. Pévère, V. Mouillet

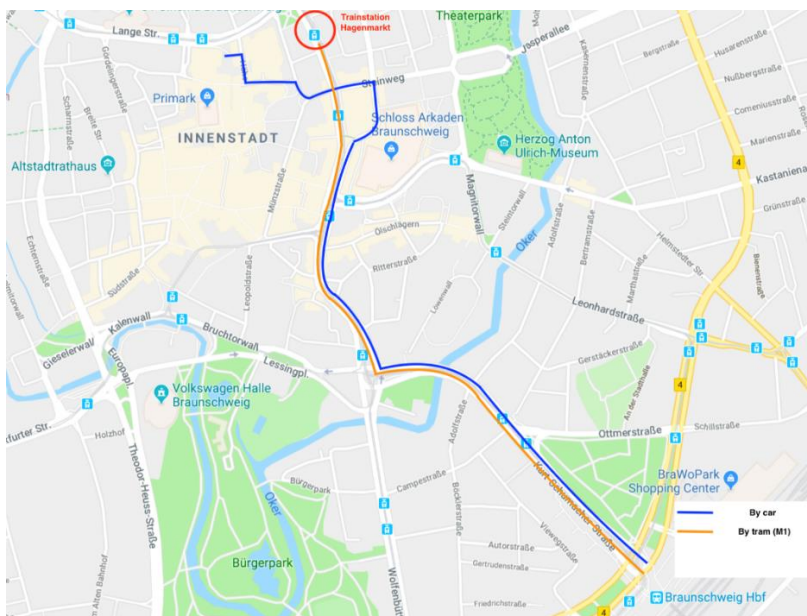

## VENUE INFORMATION

### FourSide HOTEL

The RILEM 252-CMB Symposium will be held in the FourSide Hotel on September 17 - 18, 2018.

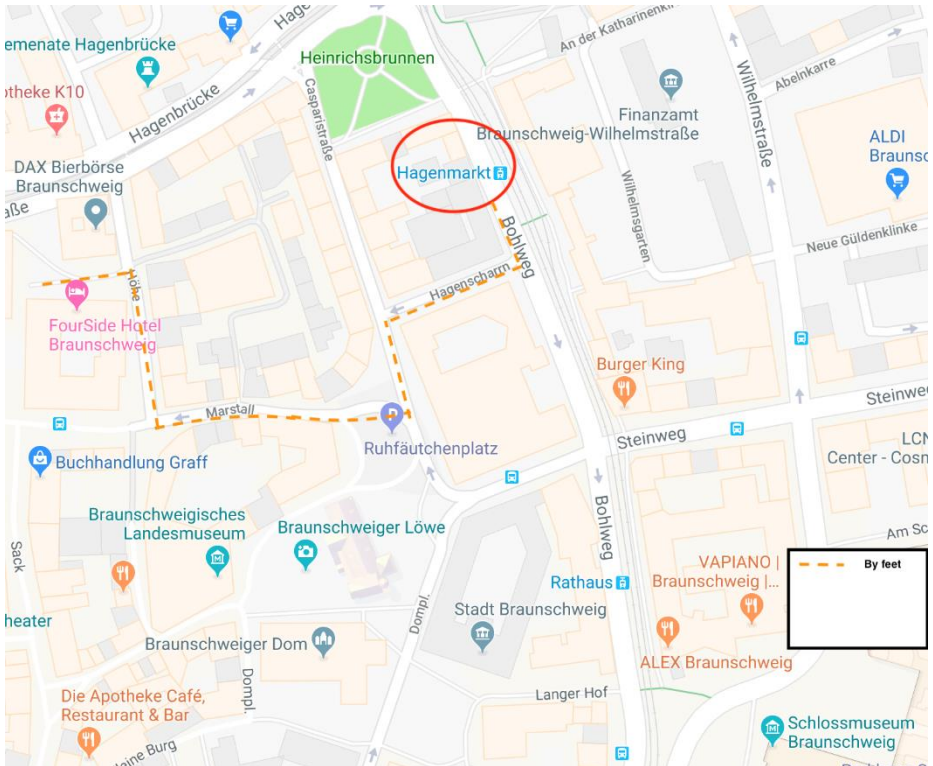

The location of the hotel is Jöddenstraße 3, 38100 Braunschweig. You can reach the hotel by car or by tram M1 / M2 (drop off station Hagenmarkt):

## VENUE INFORMATION

If you go by tram, you can walk to the hotel from the tram station Hagenmarkt (about 5 minutes):

### RILEM DINNER

The dinner of the RILEM 252-CMB Symposium will be held in the FourSide Hotel on Monday September 17, 2018. You will receive the Dinner voucher during registration.
